REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the combination of limitations "...suspending the poultry wing from its tip segment at a position away from the tip joint at a protrusion in the tip segment, advancing the suspended wing along a processing path with the outside surface of the poultry wing facing one side of the processing path, as the wing is advanced: bending the primary segment of the wing at the elbow joint with respect to the mid-wing segment of the wing laterally about an elbow guide positioned on the outside surface of the poultry wing until the elbow joint is opened, as the elbow joint is opened, stretching the tissue extending between the primary segment and the mid-wing segment about the elbow joint, separating the stretched tissue extending between the primary segment and the mid-wing segment at the elbow joint at a position that exposes the end of the bone of the primary segment and separates the primary segment from the mid-wing segment, such that the tissue about the bone end of the primary segment tends to retract from about the bone end and leave the bone end exposed..." in claim 1 and the combination of limitations "...suspending the poultry wings from their tip segments, advancing the suspended wings in sequence along a processing path with the outside surfaces of the right wings facing one side of the processing path and with the outside surfaces of the left wings facing in the same direction as the outside surfaces of the right wings, as the wings are advanced: bending the primary segments of both the right and left wings with respect to the mid-wing segments at the elbow joints about an elbow guide positioned on the outside surface of the poultry wings until the elbow joints are opened, and separating the tissue extending between the primary segments and the mid-wing segments at the elbow joints to
